Nitto Group Reportable Chemical Substances Substance Examples version 1.00

- *The CAS RN® on this list shows examples of substances. Substances that are not listed in it but fall under of "chemical substance name or substance group" are reportable chemical substances.
- * Reportable Chemical Substances are selected from those currently under consideration for regulation in various countries. However, the list also includes substances that are already subject to communication through information communication tools such as chemSHERPA.
- * Regardless of whether it is intentional or unintentional, if the content is known to be 0.1% or more, report the content in the "Table of Chemical Substances Contained in Delivered Products". However, for fluorine and fluorine-containing compounds, report their content in accordance with Section 7 of [Notes on Entry] in the "Table of Chemical Substance Components in Delivered Products.
